DuPont™ SafeGUIDE™

DUPONT™

DuPont™ SafeGUIDE™

An on-site field assessment program to help enhance and standardize your protective apparel inquiries.

Mitigate risk. Maximize compliance.

SafeGUIDE™ is a field assessment program that provides a customized, multi-tiered solution to help enhance and standardize your chemical protective apparel inquiries.

Every assessment is reviewed by our Certified Industrial Hygienist (CIH) team to help you keep your workforce safe and in compliance. Our CIH professionals offer extensive hazard identification and risk assessment expertise so all guidance can align with the latest standards and best practices in industrial safety.

With SafeGUIDE™, you can effectively manage workplace hazards and maintain a safe, more efficient environment with a customized plan that helps address your unique needs and challenges.

Our field team offers an extensive hazard assessment tailored to your specific jobsite.

The benefits of SafeGUIDE™

Consistency

Establishes a standardized approach to help ensure a uniform workplace protective apparel selection process and regulatory compliance that can be easily replicated across multiple job sites.

Work safety support

Provides proactive safety measures for injury avoidance and protective apparel selection to help keep workers as safe as possible.

Cost-effectiveness

Streamlines processes, can help reduce the need for paid consultancy and promotes hazard identification and mitigation to help prevent costly injuries.

Compliance

Equips your team with OSHA and job hazard analysis documentation to help job sites comply with safety regulations.

A comprehensive process for protecting workers

The DuPont Personal Protection team understands that every workplace has unique challenges. That's why we offer a structured, step-by-step approach to help ensure your safety program is optimized for performance, compliance and comfort.

By conducting thorough on-site assessments, SafeGUIDE™ can address the unique safety needs of work environments, utilizing a blend of in-depth assessments, tailored guidance and continuous support.

Define

We work with safety managers to define an assessment scope based on the specific needs at your workplace.

The SafeGUIDE™ journey starts with a request via a distributor, a DuPont team member or directly using the SafeGUIDE™ "Contact Us" form.

After providing details about workplace hazards, past assessments, protective apparel usage and any safety issues you have, we'll schedule the assessment for your specific needs—all at no cost to you.

Assess

Our experts conduct a thorough walk-through and engage with employees to develop a customized and CIH-backed protective apparel selection process.

For a first-level assessment, a trained DuPont safety professional will conduct an initial on-site evaluation.

For a second-level assessment, a Certified Industrial Hygienist (CIH) will also be on-site.

Analyze

Collected data will be reviewed to develop actionable insights and clear guidance to help strengthen your protective apparel selection process.

A Certified Industrial Hygienist (CIH), will review your on-site assessment data to ensure all insights and guidance are accurate and actionable for a solid foundation to enhance your protective apparel selection process.

Guide

We provide a detailed report with protective apparel and product guidance and offer training and follow-up visits to help navigate complex regulations and support compliance for long-term success.

After a thorough evaluation of your assessment, you will receive a comprehensive report with customized protective apparel guidance, including product purchasing details.

The final report is delivered as a PDF with DuPont representatives and distributors available for any follow-up questions and assistance with protective apparel procurement.

To provide long-term safety compliance, reports will be archived for future reference.

With SafeGUIDE™, you benefit from solutions that support compliance and enhance safety where it matters most—right where your employees work.

Chemical Processing Facilities

Chemical plants require precise and stringent safety protocols due to the potential risks of exposure to hazardous substances. Our SafeGUIDE™ experts specialize in assessing these high-stake environments to help support compliance and safety in complex operations.

Cleanrooms

When sterility is as crucial as safety, SafeGUIDE™ provides specialized evaluations to address the unique needs of controlled environments. Our assessments focus on preventing contamination and ensuring the integrity of processes and protection of the personnel to help maintain necessary conditions for high-quality production and research.

Industrial Facilities

Industrial facilities require precise and comprehensive safety measures. SafeGUIDE™ on-site evaluations help identify hidden risks and offer safety solutions that match the scale and specifics of industrial operations.

Create a safer workplace with DuPont™ SafeGUIDE™
