MALLORY

MALLORY SAFETY EQUIPMENT SERVICE AND REPAIR

Mallory's experienced Service Department allows you to spend less time worrying about your equipment and more time focusing on organizational safety and growth.

EQUIPMENT REPAIR

Mallory's experienced staff of factory-certified experts is dedicated to providing the highest quality service in the industry.

In-house safety equipment repair is available at many of our major locations across the Western United States. Mallory Technicians deliver fast product repair. Also, Mallory can provide convenient on-site service anywhere nationwide – or offshore.

Mallory specializes in Safety Equipment Servicing for:

- ☒ Gas Detection (Fixed & Portable)
- ☒ Fall Protection Gear
- ☒ Respiratory Equipment (SCBA & Airline)
- ☒ Compressors
- ☒ Fire Equipment
- ☒ Industrial Equipment

MAINTENANCE & CALIBRATION

Making sure that your equipment is functioning, tested and compliant is a cornerstone of a strong safety plan. Keeping your equipment properly maintained can be a difficult job and having to replace a product or system is costly, and can reduce jobsite productivity and revenue.

Mallory provides customized maintenance and calibration services that match your organization and jobsite timelines.

Our team of product experts service, calibrate, and certify portable and fixed gas monitors, SCBA respirators, and more. Maintenance and calibration can be scheduled monthly, quarterly, yearly, or as you need it. Service Technicians will schedule maintenance that fits your timeline, so your equipment will be ready when you need it.

KNOWLEDGE AND EXPERTISE IF WE SELL IT, WE SERVICE IT

Our in-house experts allow us to do even more than repair and maintenance service. Mallory's trained technicians and specialists also provide knowledge and expertise on helping you select the right product for your needs. We also can train you or your staff on proper usage of the equipment. Mallory also offers respirator facepiece fit testing, and HazMat suit pressure testing. The Mallory Team can also provide consultation and guidance on how the equipment will fit into your safety program.
