

THE COMPLETE RESPIRATORY SERVICE SOLUTION FOR SAFETY PROFESSIONALS.

MALLORY
Safety and Supply
READY TO WORK

WHY CHOOSE MALLORY?

As an authorized 3M™ Scott™ Service Center, Mallory manages your complete respiratory program. Our factory-trained and certified technicians handle everything your program requires: SCBA service and repair, flow and hydro testing, fit testing, and full and half face mask cleaning. You'll receive thorough documentation and service options built around your operations.

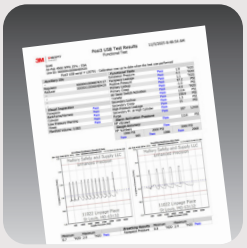

3M | SCOTT™ Fire & Safety

SERVICES:

SCBA Repair

Our factory-certified tech team services, tests, and repairs all Scott product lines, including regulators and warning devices.

Record Storage

All documentation is retained to support compliance. Records include detailed cylinder identification, test results, and service history.

Annual Flow Testing

We test each SCBA under simulated conditions using specialized breathing machines to verify performance against manufacturer and NFPA 1852 specifications.

SCBA Cylinder Filling

Grade D Breathing Air.

Pressures: 2216 PSI, 3000 PSI, 4500 PSI, 5500 PSI.

Capacity: High/low pressure SCBA cylinders, 300 or 444 cu. ft. cascade cylinders.

Hydro-Testing Service

Our technicians test each cylinder using the Water Jacket Test to measure expansion and integrity. All testing meets DOT, CGA, and manufacturer criteria.

Compressor Air Quality Testing

NFPA Quarterly Air Analysis Testing to verify the purity and safety of your breathing air supply.

Warranty Repairs

Authorized repairs by certified technicians to maintain your equipment's warranty and longevity.

ADDITIONAL SERVICES:

Fit Testing

Our Fit Testing solutions meet OSHA 29 CFR 1910.134 requirements to ensure your tight-fitting respirators offer effective protection.

Quantitative Fit Testing
Uses specialized instruments to measure actual leakage into the mask, providing numerical data for a superior fit assessment.

Qualitative Fit Testing
Pass/fail test using a Stannic Chloride agent that relies on the user's senses to detect leakage.

OSHA Respiratory Medical Clearance

Personnel are medically cleared to safely wear a respirator before fitting and use.

Full & Half Face Mask Cleaning

Professional cleaning to maintain hygiene and prevent cross-contamination. After inspecting each respirator, we use a two-part process that cleans and then disinfects each unit.
Each respirator is then stored in a sterilized bag.

Mobile Service (On-Site)

Our dedicated service truck or trailer comes directly to your location to ensure your critical equipment remains on-site and immediately available should an emergency call arise during the testing process.

In-House Service

Drop off your equipment at our facility for efficient, professional servicing. We're fully stocked with all the specialized tools and a deep inventory of spare parts.

PROTECT YOUR PERSONNEL AND MAINTAIN FULL COMPLIANCE.
